

Editorial Announcement

The Editorial Office of *Archivum Immunologiae et Therapiae Experimentalis* (AITE) announces the following:

in 2025, as the 23rd item, a Retraction Note was published concerning the article originally published in AITE in 2006, entitled „Modulation of apoptosis signaling for cancer therapy” by Simone Fulda and Klaus-Michael Debatin (*Arch Immunol Ther Exp* **54**, 173-175, 2006). As a result of an oversight the Authors have not received the letter informing about the Journal’s intent to retract the article. Therefore, the AITE Editorial Office has decided to recall the Retraction Note. This means that no retraction action is currently in effect regarding the aforementioned article.
