

A note on the methods of analysing traveling waves

By CHING-YEN TSAY, *National Center for Atmospheric Research, Boulder, Colorado 80302, USA*

(Manuscript received November 7, 1974)

In the contribution by C.-Y. Tsay "A note on the methods of analysing traveling waves", *Tellus* 26, No. 3, p. 412, there is an error which could lead to misinterpretation of Tsay's results. His equation (12) should read

$$\mathbf{Ab} - \mathbf{aB} = \mp (R_{k, \pm \omega})^2 \mp R_{k, \omega}^* R_{k, \pm \omega} \cos (\phi_{k, \omega}^* \pm \phi_{k, \omega}' - \phi_{k, \pm \omega})$$
