

Editor's Note

It is with great pleasure that we present Volume 11, Issue 2 of the *Journal of Dry Zone Agriculture*. This issue continues our commitment to publishing scientifically sound and relevant research that contributes to the advancement of agricultural, biological, and environmental sciences. The articles presented in this issue cover diverse areas of research, reflecting the increasingly multidisciplinary nature of contemporary agricultural science. Collectively, they contribute new knowledge and perspectives relevant to sustainable production, biodiversity and environmental monitoring, resource management, and agricultural development.

Following the editorial and publication improvements introduced during Volume 11,

the Editorial Office continues to strengthen the quality, transparency, and efficiency of the journal's peer-review and publication processes. We remain committed to maintaining rigorous scientific standards while facilitating the timely dissemination of research.

We sincerely thank all authors, reviewers, Associate Editors, editorial team members, and readers for their continued support of the *Journal of Dry Zone Agriculture*. Their contributions are essential to the continued development and visibility of the journal.

We look forward to receiving high-quality research that advances agricultural science and supports sustainable development in dry zone regions and beyond.

Editor-in-Chief - Dr N. Thiruchchelvan

Associate Editors - Dr K. Jeyavanan & Dr S. Sivashankar; **Copy Editor** - Mr K. Venugoban
