

TalTech Journal of European Studies

ISSN 2674-4600 (print), 2674-4619 (online)

Journal published by TalTech Law School at Tallinn University of Technology

Call for Contributions

TalTech Journal of European Studies (abbreviation *TJES*) is a semi-annual double-blind peer-reviewed international research journal (formerly known as *Proceedings of the Institute for European Studies* and *Baltic Journal of European Studies*) with an international editorial office and extensive international editorial board. It is abstracted in SCOPUS, WoS and other relevant databases. The journal specializes in digitalization and technology implementation and their impact in social, legal, political, economic and cultural domains in the European Union and its Member States.

We kindly encourage members of the academic community to contribute to our journal. Papers submitted to the forthcoming issues will be reviewed by outstanding specialists if the particular field under strict supervision of our international editorial board.

There is no regular deadline for submissions. The requirements for the articles are as follows:

- The article should be in English and meet the general criteria set for a research paper;
- The desirable length of the article should not exceed 20 pages when using the 12-point font size and 1.5 line spacing (or 52,000 characters with no spaces or 8,000 words);
- The article should contain a short abstract of 300 words or less and eight or fewer keywords.

References to literature must meet the criteria of the Harvard system of citation (*Cite Them Right*, 12th edn., Bloomsbury Academic, 2022; available at <https://www.citethemrightonline.com/>). A quick guide to the style is also available at <https://www5.open.ac.uk/library/referencing-and-plagiarism/quick-guide-to-harvard-referencing-cite-them-right>.

Please note following: when using generative AI content in a submitted paper, our journal recommends that the author(s) verify the content and existence of the sources and provide proper references for those sources. In addition, it is essential to ensure that the translations generated, and terminology used are accurate and correct in content. When referencing AI-generated text in the Harvard referencing system, the author(s) should credit the creator of the AI tool as the author, both in an in-text citation and a reference list entry. If a shareable URL is available, please include it in the reference list entry. In the absence of a shareable URL, include the chat session with the AI tool as an appendix and refer readers to this appendix when citing the AI-generated text (see the examples below).

Applications based on AI that do not create new content but only process existing text (such as translation programs, text correctors and reference management tools) can be used as supportive tools, without the need to cite them. However, we encourage authors to carefully review and edit the result, as AI can generate seemingly authoritative content that may be incorrect, incomplete or biased. The authors are ultimately responsible and accountable for the content, integrity and originality of the submitted manuscript.

Examples of citing generative AI in the Harvard Style:

- If acknowledging the use of the tool generally in creation of your work:

In-text example:

See the photo of what a humanoid white tiger would look like (Shutterstock AI, 2023).

Reference list example:

Shutterstock AI (2023) Photo portrait of humanoid white tiger hybrid [Digital art]. Available at: <https://www.shutterstock.com/image-generated/photo-portrait-humanoid-white-tiger-hybrid2278820629> (Accessed: 28 June 2023).

- If directly quoting/citing a response from generative AI:

In-text example:

When asked to explain why groups of children are incapable of forming a circle, ChatGPT 3 (OpenAI Chat GPT, 2023) response includedas seen in Appendix 1.

Reference list example:

OpenAI ChatGPT (2023) ChatGPT response to Lorna Smith, 3 April. See Appendix 1 for the prompt used and text generated.

To submit your research paper for consideration in our journal, please forward it to the following address: TJES@taltech.ee
